

MAP reports & classification schemes

MAP has made many classification schemes to cover all issues relating to Augmented Persons. Here are some of them that should prove useful in discussing any legislation that might be needed.

Classification: Power Level

MAP has created a categorisation schedule of APs which may be used to provide different regulation schemes. These are largely based on observed capabilities and not carefully tested calibrations. This is a result of a lack of access. They are thus rather speculative for most AP. The categories are keyed to what level of force would be needed to contain them.

Rating	Power	Description	Typical Examples
0	Safe	Utility or cosmetic powers no more threatening than a normal person	Ability to change colour/scent Weak (100g) telekinesis Resistant to Extreme temperature (-10 to 80)
1	Mundane	As dangerous as a very competent, highly trained, heavily armed regular person	Resistant to injury Resistant to extreme environmental conditions -40 to +100 degrees Strong, 500kg, or telekinesis the same level or much lower if it is invasive. Speed 100% faster than normal Energy blasts etc equivalent to small arms
2	Challenging	Comfortably exceeding normal human capabilities but impacting a fairly local area	Strong 10t lift Highly resistant to small arms & similar trauma Single target mind control Very low duration invisibility Shapechanging (disguise) Flight or limited teleportation Speed about 5 times normal Energy blasts or similar equivalent to hand held rocket launcher
3	Dangerous	Significant challenge to local military forces	Strong 100t lift Highly resistant to conventional weaponry multiple subject mind control Energy blasts or similar equivalent to an Artillery Battery Invisibility Long range teleportation Immense speed (x20 or more)
4	Supremely Threatening	Powerful enough to challenge national military	Strong 1000t+ Damaging blasts with nuclear power. Largely immune to any damage Wide-area mind control powers
5	Overwhelming	Beyond the abilities of humanity to deal with currently	Inconceivable power

Classification: Lawfulness

Rating	Name	Description
0	Law Abiding	Behaves as a normal law abiding citizen
1	Secret Identity	Has an untraceable ID that is openly “super pwered”
2	Vigilante	Acts to stop crime outside the law
3	Criminal	Breaks laws in a routine selfish manner
4	Super villain	Threat to National Security - Threatens the state
5	Cosmic villain	Threatens humanity

These classifications are coloured by MAP’s point of view and relate to the fact that APs have a high tendency both to assume secret identities & to carry out vigilante activity. The current position is that 0-1 are legal and the rest are illegal (2 being a subset of 3). 4 and 5 will involve different government agencies (or additional ones) compared to 2 and 3. They interrelate with power as of course a power 0 Augmented Person will not be a threat to humanity. Augmented foreign agents are essentially 4.

Classification: Contacts with Government Authorities

Rating	Status	Meaning
0	Unknown	Hidden from Government
1	Inactive	Not using their powers
2	Independent	No work for government
3	Consultant	APs hired as needed
4	Agent	APs work for the government full time
5	Conscripted	APs are required to assist the government in emergencies
6	Indentured	APs must work for the government full time
7	Test Subject	APs must submit to experimentation

0-4 are current ways the APs interact with the government (or avoid interaction)
5-7 are possible requirements that could be put on some or all APs.

There are also sanctions or restrictions that could be applied to APs.

Classification: Suitable Restrictions for APs

Rating	Level	Meaning	Notes
0	Unregulated	No restrictions or monitoring	
1	Registration	Optional Sign up	
2	Registration and Monitoring	Mandatory Registration & Monitoring	
3	Tracker Tagging	Electronic GPS tag or similar	
4	“Aggressive” Tagging	Attached explosive devices or similar	
5	Chemical Neutralisation	Powers suppressed using drugs or machines	Not possible with current tech but believed to be just around the corner
6	Incarceration	Locked securely away	
7	Purification	Euthenased	

Classification: Vetting Procedures

Rating	Level
0	None
1	Self certification
2	Simple checks on APs
3	Universal confirmation tests
4	Extensive invasive testing

Classification: Liability for damage caused

Rating	Level	Description
0	Exempt	APs are exempt from claims for damages that cause
1	Government fund	Government fund set up to cover damages caused by APs.
2	Public Insurance	APs must take out insurance in a Government licenced scheme
3	Private Insurance	Insurance Companies are encouraged to offer AP’s cover
4	Full liability	APs personally liable for damages
5	Enhanced liability	Personal Liability, enhanced due to increased duty of care. Criminal charges will be pursued
